

```
interface solution
{ public void Hello();
  public void Welcome();
  public void Name(String n);
```

```
}
```

```
class A implements solution{
```

```
    public void Hello(){
        System.out.println("Hello world");
    }
    public void Welcome(){
        System.out.println("Welcome to India");
    }
    public void Name(String n){
        System.out.println("I am "+ n);
    }
}
```

```
public class InterfaceEx1{
    public static void main(String[] args) {
        A a = new A();
        a.Hello();
        a.Welcome();
        a.Name("Hitesh");
    }
}
```
