

```
class Data{
    private String n;
    public void set(String name){
        n=name;
    }
    public void get(){
        System.out.println(n);
    }
}
public class AccessSpeciferEx
{
    public static void main(String[] args) {
        Data o =new Data();
        o.set("Hitesh Mourya");
        o.get();
        //System.out.println("Hello World");
    }
}
```
