

```

//calculator
interface Machine
{
public void start();
public void stop();

}

class Car implements Machine{

public void start(){

    System.out.println("Starting Car ..");
}
public void stop(){

    System.out.println("Stopping Car");
}

}

public class InterfaceEx3{
    public static void main(String[] args) {
        Machine mac = new Car();
        mac.start();
        mac.stop();
        paint(new Car());
    }
    public static void paint( Machine m) {
        m.stop();

        System.out.println("Painting ....");
        m.start();

    }
}

```
